

Learning Experience 1

Career Quiz: More than just a job

The purpose of this learning experience is to introduce individuals or groups to career development and planning concepts.

Ask individuals to think about what the word `career' means to them.

Brainstorm and develop a mindmap about what the group already know about careers. Use **Career** at the centre of the mind map. Suggested sub headings include:

- career development;
- career pathway; and
- career planning.

Refer participants to myQuiz. The Career Quiz – Career: More than just a job, explores the foundation concepts of career development.

- Go to <http://www.myfuture.edu.au>
- Select Assist Others > myQuiz > Career quiz

Ask each participants to identify three things they discovered about careers, through playing the Career quiz.

Revisit the mindmap developed earlier and add new ideas and thoughts that have emerged as a result of playing the Career quiz.

Consider the ideas that have been recorded and identify themes. Select several headings and ask participants to categorise the ideas from the mindmap under these headings, so that clear themes are apparent.

This learning experience complements **Activity 20 – The Facts: My Career** which can be found in the **myfuture Training Kit Section D2**.
